Professional Summary

Results-driven Software Engineer and IT graduate with a strong foundation in web development, Linux server deployment, and backend security implementation. Actively transitioning into networking and cybersecurity, backed by ongoing professional training (Cisco NetAcad and Fortinet NSE) and hands-on experience hardening web applications, configuring API security layers, and managing cloud-hosted infrastructure. Eager to bring a rigorous, system-level perspective to modern network administration and infrastructure teams.

Certifications

Introduction to cybersecurity September 02, 2026

Cisco

Linux Unhatched September 06, 2026

Cisco & NDG

Experience

Albay Electric Cooperative, INC Legazpi city, Albay

Associate Software Engineer Feb 2026 – June 2026

- Developed power interruption system leveraging React JS, Vite framework, Node.js, Express backend, Linux server, and MySQL database.
- Created report management system with Google Maps API integration for geolocation tracking and ticket management functionalities.
- Strengthened application security by employing rate limiters, JWT tokens, Google authentication, and role-based access control measures.
- Quickly resolved production support incidents while adhering to service level agreements.
- Enhanced database queries through effective indexing, query tuning, and stored procedures in SQL Server environment.
- Provided timely solutions for technical issues arising during software development lifecycle.
- Incorporated third-party APIs such as Google Maps API into application architecture for improved user experience.
- Applied agile methodology to enhance existing applications with new features focused on performance improvements.

Developer Project

ALECO PIS (Power Interruption System)

React, Tailwind CSS, MySQL, Cloudflare, HTML5 Geolocation

- Built and deployed a utility logging and public advisory web application to track brownouts and manage consumer incident reports.
- Integrated browser geolocation with automated municipality fallbacks and Google Maps visualization to map outage zones.
- Configured edge security, WAF rules, and DNS proxying via Cloudflare alongside a role-based access control (RBAC) architecture.
- Built a custom Ticket Management System that handles user complaints process by process and with queue system
- Built a custom Poster Image Auto Generation for power news & updates; can be shared via link or facebook and other social media platforms
- Integrated SMS feature and Email automation for updates and notifications

- Built and Integrated an advanced backup & data flushing system to export data to excel and to recycle server & database storage.

Awards

Commendation Award — June 2026

Albay Electric Cooperative, INC

Skills

Performance tuning	**Troubleshooting**	**Performance analysis**	**Database programming**
Web applications	**Network administration**	**Object-oriented programming**	**Team reporting**
Cloud computing platforms	**Project management**		

Education & Professional Development

STI College Legazpi — Bachelor of Science in Information Technology • 2.02 GPA

Software Engineer — Barangay 20 Cabangan East • June 2026

- [1st semester, 1st year] - Top 2 in Computer Programming 1
- [2nd Semester, 4th year] - OJT awardee: (Commendation Award)
- Loyalty award
- Capstone Project: Oro High Portal- Role: lead developer & full stack. Description: Thesis is based on ELMS / School Portal that aims to enhance learning resource availability and flexibility of everyday public school routine.
- STI College Student Council - Junior Councilor

Cisco — Cisco Network Academy (NetAcad) in Networking

Cybersecurity & Network

- Currently enrolled to a self paced training to leverage my skills and apply networking fundamentals into practice
- Focused on executing fundamentals knowledge, master the basics, & obtain industry certifications

Fortinet Training Institute — NSE 1 & NSE 2 in Cyber Security

Cybersecurity & Network

- Currently enrolled to leverage my knowledge about threat analysis, SIEM tools, Cyber kill chain, & attack patterns / techniques
- Eager to gain industry certifications, leverage my knowledge, and apply all those security theories into practice
